

Declaration on Non-Use of EU POPs Regulated Substances

Polymaker is committed to environmental and health safety. In this context, we investigate and control the use of chemicals restricted by Regulation (EU) 2019/1021 on Persistent Organic Pollutants (POPs).

To the best of our knowledge and belief, based on supplier information or our own due diligence, all products supplied by **Polymaker**, do not intentionally use POPs prohibited substances and therefore the listed substances in Annex I and/or Annex III of (EU) 2019/1021 and its amendments are not expected to be present above the limit values, if applicable. However, the presence of analytically detectable traces, which have possibly been introduced via raw materials, auxiliaries and additives, cannot be excluded.

We commit to continuous monitoring of regulatory developments and supply chain information to ensure ongoing compliance assessment. It is important to note that downstream processes applied to 3D printing filaments, which is beyond our control, other unknown additional substances or contaminants might be introduced during printing process. Therefore, it's recommended that the customer evaluate the overall safety of the final article in its end-use application.
